Inside the ABC4EU - consortium

In this newsletter we would like to take a look at the consortium of the ABC4EU-project and present to you how each organization individually contributes towards the completion of ABC gates.

There are various companies, universities and authorities with different kinds of expertise who have joined forces together, towards building the automated border control gates.

We have, for example, experts in fingerprint and facial recognition technologies, experts in security field and user experience from similar automated border checkpoints, experts in studying the social, legal and ethical aspects of deploying such technologies in our society and so on.

The companies come from all over Europe including Spain, Portugal, Germany, Italy, Estonia, Romania and Finland.

In the following map you can find more detailed information as to see in which country the respected company is working and also, in what field it is engaged inside implementing to the project.

By clicking the partner’s logo you will be redirected to the company’s website description for further information.
Automated Border Control Gates for Europe
